To get started using Photoshop Elements you first need to download it from the Adobe website. You then have to create an Adobe ID, which you will use to purchase any software. You also have to create your Adobe Stock account. Setting up the software Once your Photoshop Elements has downloaded to your desktop, you need to open it and go to File > Open. You will have a Choose File dialog box for you to choose where to find the image you are going to open. There is a new feature called 'Save for Web' on Photoshop Elements. This option appears when you save your image and you have the option to save it as an image you can share online. In order to save your images for web, you need a URL to share on the web. To create a URL, click on Photoshop Elements > Preferences (P) > Advanced > Bookmark > Set Current (if you don't have this option, go to Preferences (P) > Save) > Set Current (File Name) and press enter. This will add a bookmark file to your computer that saves a link to the file. Now you can share your file to the web using a URL. A word of caution on this function. On some computers when you save a link to the file, the browser will open a blank page and not your image. If you are going to use Photoshop Elements for a website and you want to use a bookmark to save a link, you need to make sure to use the same computer to view your images. The Image Controls panel When you open Photoshop Elements, you will be presented with the Photoshop Image Controls. The Image Controls panel has a number of useful tools for editing images. Below is a list of the tools

available in the Image Controls panel and their explanations: Image Size: Resize and resize to specific dimensions. Pages Monday, October 15, 2010 Pretty in Pink I was contemplating the hella yummy skirts I received in the mail a little while ago, and how I need to get more in my closet. So I decided on a Pretty in Pink manicure. I painted my nails a light fuschia, and my choice color is from Sally Hansen's Hot Stuff in the color Pink Queen. I plan on picking up more colors from this brand. Some new fall's colors I've been eyeing up are in the turquoise colors in the Spring collection. I plan on picking up these when they come out. While searching in my stash of nail art supplies I noticed I also own green nail polish which is a completely new color to me. I was a little surprised to see how much I liked it...yeah I like the color. How many shades of green have you even known? The polish of course was perfectly opaque in three coats. I chose not to add a top coat, so you may want to add one if your nail is having trouble with drying. And if your nails are a little smaller, it might take a few coats. But I was pretty pleased with the result. No comments: Post a Comment About Me Lover of Life, fashion and makeup. I want to live a beautiful life with my husband and two children. A wide variety of types of material handling systems and methods are known in the art. In a typical system, a multiplicity of delivery vehicles are arranged to deliver materials to a multiplicity of bins or other types of storage containers and, for example, recyclers. Materials to be processed may be, for example, all types of household waste and municipal solid waste, which are particularly high volume materials. The multiplicity of bins in a recycling system, which may be for example a "clean" recycling system, an "in-situ" recycling system or a "reuse" system, for example, permit use of a single delivery vehicle for many different purposes. A particular delivery vehicle may be used for the initial pickup or for at least one of the type of processing (e.g., recycling). For example, a single delivery vehicle may be used to pick
