Dupio: *CS:GO Dupio* lets you know your positions and what weapons and items are in play without having to build any radar like systems. It also puts you into a friendly headset mode, so you get to use it as a heads-up display or an overlay mode. You can set it to your favorite map and even use your own voice to let you know what is going on with your gun and enemy. It follows the same design principles of how good FPS games should work.

Top:

It should be fast and responsive! It should

make sure that it correctly helps you out instead of completely ruining your gameplay It should teach you! It should tell you
