Hex is a mmo turn based strategy set on deus ex machina planet located in outer space. It is set into ancient history and takes place during war against robot empire. You are tasked to gather 6 items and get them to safe place. When you do your deus ex machina, you get to see if you and your allies outplayed enemy and win or if you toasted! It is turn based 4 player game and you can play solo or online against other players. Hex can get a bit tricky, mostly because of randomness of game play and the very limited number of resources. If you are into turn based strategy and like to test your skills on aliens and awesome machines of the long forgotten ages then you have found your game. \*Note for modders/developers: The soundtrack in the game is not fully created yet. So if you want to add new stuff to game please contact me. If you want to contribute, include sounds, music or other assets please contact me. \*Note for modders/developers: Stylized sounds/music in game are currently generated by myself. Stylized sounds/music are good for quick prototyping and sound like I'm on a studio or something. Stylized sounds/music will be replaced in the final game by official one as soon as they are ready. \*Note for modders/developers: Feel free to use scripts in this mod to generate any randomness needed by the game. Just be careful that you don't break the game in case you use advanced scripting tools. \*Note for modders/developers: Feel free to share/suggest your mods/tools you are using for this game. Now I'm working on a mod for this game, and you can test it from here: Game Description: Hex is a turn based strategy set on a planet in outer space. It is set into ancient history and takes place during a war against robot empire. You control army of hexes/hexed beings to get 6 items from item resource and get them to a safe place. When you do your deus ex machina, you get to see if you outplayed enemy and win or you toasted! Turn based game taking place on random generated planet. Pleasure is giving your good-luck card to the shopper and praying for him to obtain a treasure. It's the first step in the game. As the game moving forward, 2 steps are also included. Shopping by p5P 1. Collecting special item to fill customer's wish list. 2. With good luck, buy items via selected items by p5P. 3. After buying, return to the shop to fill the wish list. Note that customer's wishlist can't be changed. 4. Repeat from the above, you can get 5 times to buy any one item. When customer's wish list is full, you will be gifted with a high price one. Provide and influence? One note 1. Each customer has a fortune meter. 2. When fortune meter is full, it can't be filled again. 3. You can influence customer's fortune meter by doing good-luck card. 4. If you can influence a full fortune meter, you will be gifted with a higher item than usual. 5. If you succeed to influence a fortune meter, it's really worth it. More customer will come to you. Easy and simple? No! 1. Starting this game, you will see customer's list. 2. You can choose any item. 3. You can influence customer's fortune meter. 4. After that, you can choose an item. You will buy one by that customer. 5. You will return to shop to find out how much money you have bought. After that, the shopkeeper will decide whether you buy the item. 6. You will go back to customer's list to see if the sale is successful. If so, you can influence customer's fortune meter again. 7. Repeat steps 2 to 5 until the shopkeeper gives you the fortune. 8. When you fail, the shopkeeper will be dissatisfied. 9. For how long time can you continue to influence customer's meter? Yes, only half a day. 10. For your understanding, this game is like gambling in the past. You can also cheat to get the customers and do good-luck card again to influence the customers' fortune meter. It will definitely result in higher items. If you have any question, please contact me in steam chat, or through discord. P.S. sorry for my bad english. This is a simple text-adventure game. Your goal

For Ninja gear lovers, The Ninja Girl's Dungeon is a game where you, the hero, will be launching ghosts in a dungeon! The dungeon where you will go through has been customized for you! You can choose from 5 levels, and it's all included in the game. The overall objective of this game is simple: Defeat the boss to win the game. The 1st boss you will face is obviously the princess Yamatayouma-sama, the princess of the ghost world. Prepare your ninja weapon and fight against her! In addition to the fight against the boss, you will also be able to fight against other ghosts along your way. There are various types of ghosts, such as kappas, toads, and umbrellas. There will be scrolls that you can use to battle against them. There will be weapons that you can use to fight with other players. There will be bosses along the way, so you will need to use items and items in various ways. There will be skills to use, and using those will help you defeat the boss. You can acquire new stats by fighting against ghosts, so you can aim for max stats! Try to get to the top floor, where the princess is, and beat her! The higher you go in the dungeon, the stronger the boss will become! But if she comes out of that door, you can no longer advance any farther, so you need to stay away from it! There is a shop along the way. You can equip a variety of items and use them. You can even set up equipment items to have effects on another equipment item. There are also abilities that you can use. Equip your ninja gear, pick up all the strengths, technique, and mentality points, and use a variety of abilities in various ways! If you want to learn more, check the control page on the pause screen. The gameplay is easily understandable, and well-thought-out. Some may not like the costume, but it really does not matter. There are many endings! Praeseekae: Tell me what you think of the game and also, can you recommend any other games that I might like? Thank you! Dev Blog Time! Game and setting Overview You will be facing the princess, Yamatayouma-sama, at the top floor of the dungeon. Prepare your ninja weapon

Exactly. Maybe we should start doing more of that? I don't know about other people, but I'd love to meet the people around the world who have profound respect for women. I'd love to know there's another country where the women are in power, the men are pretty much in submissive roles, and the women just go out to do stuff. Doesn't really sound like a stable system. To be fair - if you think about it, there are conditions that contribute to a very bad development process where really, you can't really blame the programmer because part of the problems stem from the naive's answers to the question of how to program. I mean, if I encounter a situation where a girl is so horribly misinformed about programming that no matter what I could say to help her/him, it will never change and I am just wasting my time, then it's understandable that I'd just give up.
