Puzzle: "This is the one that the Devil put in his soul. But the puzzle cannot be solved! Too much data and links to elements." Hero: The hero has been kidnapped by the Pirate Hell Crack Mac, and now the only thing that stands between you and a return to normal life is to solve the puzzle - okay, it isn't the whole puzzle, it's just a part, but it's the only one that gives you a moment's peace. Puzzles and games like this

one are simply NOT made for the mentally healthy, but make a certain part of the brain happy. They drain the energy, and the mysterious part is looking for a solution. And this part looks for it the most when we are stressed or tired. So, maybe sometimes it's time for a chess solved game or crossword solved. But in case of puzzles, this would be an illogical approach. Why? The "brainless" parts of the human brain knows better than this. They are in charge of breathing and keeping us alive when we are weak. We need this kind of "sedative" time often. So we are not trying to do something, just have a pause for a while. But in case of puzzle solving, it doesn't work that way. This is the reason why creators of puzzle games are so called "archeologists". They study the theory behind puzzles and work hard to find a balance between puzzles that were too simple or "far-

fetches” and puzzles that were too hard. So the puzzle you are trying to solve might look easy, but there is a good reason why you cannot really solve it. You are the hero. Your goal is to solve the puzzle. You will find the puzzle on a sunny beach. You can use any of the tools available to you - from a pencil and a map to a laser cutter. You can also distract animals (and people, but they are too lazy to help you) and gather helpful hints when you need to. You are controlling the pace of the game, there is no time limitation at all. It might take you one minute or a hundred. No rush here! Open waters are ahead of you, no worries about storms or ships or pirates. There are no obstacles to trip you up - the path is endless. Just the path of the puzzle solver. It's time to dive into the water. Not everything is as easy as it seems. Before

## **What's new:**

**'s Gate Pirate Hell's Gate is a fantasy novel by Nicholas Meyer, published in 1991 by Ballantine Books. Plot The central character of the novel is Jim Anderieson, an Oxford phys-ed student at Trinity College and "a musician" (Meyer's emphasis; Jim plays in the Trinity Rhythmic Choir). While Jim is visiting an Arctic colleague, he receives a teletype message instructing him to meet with a career diplomat at the U.N. High Commission on Samos, where Jim is teaching a course in Medieval History. (Jim's father was formerly British Ambassador to the United Nations, and Jim has been advising his father for some years in the latter's capacity as head of a London think tank specializing in security.) Jim's teacher has provided him a list of drugs similar to the amantadine, an anti-flu remedy formulated by Nobel Prize winner George Hoyningen-Huene. The name of the drug matched the name of a Turkish creation myth, "Ancient Man and the Plague of King Death." Jim turns up in New York in time for the conference there by mutual instructions from both the U.N. and NASA. On the business side, the comm-center is expressing concern about "two" (Anderieson's emphasis) factions, apparently at war, causing an epidemic of a mysterious and fatal disease; it occurs to Anderieson that a disease could drive off all prey, thereby devouring its own source. Jim and his father are being briefed by the U.N. personnel who will be in attendance. After learning Anderieson's drug prevents the disease (something neither NASA nor the U.N. have ever been able to find out before), they present him with the assignment of tracking down the perpetrators of this plague, because of their knowledge and antidote. Jim is already aware of the two factions that are producing the disease and the outbreak: the Diplomats, who are hungry for reasons that could be either world peace or world war, are causing a worldwide proliferation of disease by engineering biological weapons; and**

In addition to the disease, both factions are causing an apocalyptic revulsion of all species of wildlife. The diplomatic faction reveals that they have engineered serious pandemics in the past.
