The Rose is the first Screensaver I ever programmed. It represents the first known type of petals to evolve on a plant. The fact that red roses are the most common is due to their capacity to attract insects. The Rose screensaver begins at night, when the flowers are fully opened. The Rose Animation uses up to 10 different images of a rose in different poses. As the colors get brighter, the animation becomes more visible. The Rose screensaver is the most beautiful of all the screened savers I have. The Rose Screensaver4 Features Hover mouse: You can use the mouse to move the rose around the screen. With the mouse you can watch the animation and the bee in the rose. You can also use your mouse to stop/start the animation. You can chose the images of the rose. Autostart: You can start the rose screensaver every time your computer starts. Slideshow: You can watch the animation in its true form. A slideshow is included to allow you to view your rose screensaver in its most natural form. There are 13 different poses of rose. You can choose the color of the rose. Random pictures: You can choose the pictures of the rose as you want. In this folder I have many different images of a rose. In this section you can chose the size of the rose and other additional options. If your computer has been slow you can use the "speed slider". You can play by pressing F8. Sumo Screensaver3.9.4The Sumo Screensaver, developed by Kingsoft, is a sumo wrestling screen saver based on the classic game, Jigen-Oshi.
