You know those games where you play as a soldier... And you must kill a lot of enemy? Well, this is much easier than you think. UNFAIR is a game, which developed by a lone developer, where you play as a soldier of the future. You will use your rifle to kill enemies, but you also will be able to use basic behaviors and upgrade your rifle. Rifle Progression : - Study each behavior - Increase your rifle attack power (both projectile and ammunition) - Increase your rifle range and penetration (for example: grenades or grenades). [Credits] - Written and programmed by Renaud : - Public domain games : the freeware RPG (Role Playing Game), the freeware action game, the freeware top down view game - Additional models by Roman Philippus. - Thanks to Gitter Developpeur : m.guimoneau@free.fr - Thanks to Amibisy for his models. - Thanks to the communities of github for their programs. - Thanks to CGA for his role playing game and to z7 for the 3d model. - Thanks to everyone who helped me to develop UNFAIR.
